

# Vue.js to HTML cheatsheet.

## Outputting Data Into HTML

```
{{ variable }}
```

```
{{ metadata.subtitle.value }}
```

## Outputting Data Into HTML Attributes

```
< ... :name="variable">
```

```
<a :href="`https://twitter.com/${author.twitter.value}`">
```

## Iterating Over Data Sets

```
< ... v-for="item in collectionVariable" :key="item.uniqueKey">
```

```
<article v-for="article in articles" :key="article.id" ... >
```

## Conditional Markup

```
<... v-if="variable !== null">
```

```
<div v-if="data.length > 0"> ... </div>
```

## Adding Standard Class Attribute

```
<... class="classname">
```

```
<div class="sidebar__inner">
```

## Outputting HTML

```
< ... v-html="variable"></...>
```

```
<div v-html="article.teaser"></div>
```

## Iterating Over Data Sets With Index

```
< ... v-for="(item, index) in collectionVariable" :key="item.id">
```

```
<article v-for="(article, index) in articles" :key="article.id" ... >
```

## Conditional Markup With Else Branch

```
<... v-if="variable !== null"> ...  
<... v-else>
```

```
<div v-if="data.length > 0"> ... </div>  
<div v-else>Loading...</div>
```

## Passing Data To Child Components

```
<component :componentVariable="variable">
```

```
<links :author="author">
```
